

<b>PRODUCT</b>	<b>Acrynet</b>
<b>MISSION</b>	Glass fibre net primed with anti-alkaline additive
<b>CHARACTERISTICS</b>	Acrynet is a glass fibre net with 4 x 4,2 mm mesh, primed with an anti-alkaline additive. Acrynet may be used as reinforcement for waterproofing systems (acrylic, polyurethane, cement, etc.), greatly increasing the mechanical strength. This product is difficult to apply on irregular surfaces and should therefore be used on only flat vertical or horizontal surfaces; the reinforcement should be fully submerged in the product. Overlap adjacent sheets of the reinforcement by at least 10 cm.

<b>ACRYNET</b>			
<b>CHARACTERISTICS</b>	<b>VALUE</b>	<b>TOLERANCE</b>	<b>U.M.</b>
Grammage	74	± 5 %	gr/sqm
Mesh size	4 x 4,2		mm
Elongation at longitudinal tensile strength	700		N/5 cm
Elongation at transverse tensile strength	700		N/5 cm
Mesh type	braided
